

Practice VPN

For defining the networks use the rules below:

- the branch on the left side uses IPs from the network **80.44.44.0/26**;
- on the right-side use IPs from the network **4.4.60.64/27**;
- the central network uses IPs from the range **40.40.0.48/28**.

For the **remote VPN** connection, use IPs from the network to which the address **4.8.12.18/30** belongs. A connection between all devices must be ensured using **OSPF**.
